Frequently Asked Questions (FAQs)

Summary

The U2722A does not support testflow. Alternatives are Keysight parametric pro, VEE or SCPI

Question

Can I use my U2722A in testflow?

Answer

The U2722A does not support test flow functionality in Benchvue. You may instead be interested in using either the Keysight Measuremet Manager or the Keysight Parametric Measurement Manager Pro software available through the following page:

https://www.keysight.com/main/techSupport.jspx?cc=GB&lc=eng&nid=-35489.774878&pid=1369935&pageMode=DS

Alternatively, as mentioned you may be interested in using VEE for an another alternative environment. This provides a graphical programming interface which takes a very similar form to a drag and drop interface in Benchvue with more flexibility. A free trial is available here:

https://www.keysight.com/en/pd-1476554-pn-W4000D/vee-pro-932?pm=DL&nid=-32811.806312&cc=GB&lc=eng

My final suggestion is to try controlling the instrument programmatic through Keysight command expert and a programming language such as Python. Command expert allows you to build up simple test sequences using SCPI to control your instrument and gather data remotely. I recommend installing the software and accessing the help files for full documentation:

https://www.keysight.com/en/pd-2036130/command-expert?pm=DL&nid=-33002.992473&cc=GB&lc=eng
