Restricted Rights Legend

If software is for use in the performance of a U.S. Government prime contract or subcontract, Software is delivered and licensed as "Commercial computer software" as defined in DFAR 252.227-7014 (June 1995), or as a "commercial item" as defined in FAR 2.101(a) or as "Restricted computer software" as defined in FAR 52.227-19 (June 1987) or any equivalent agency regulation or contract clause.

Use, duplication or disclosure of Software is subject to Keysight Technologies' standard commercial license terms, and non-DOD Departments and Agencies of the U.S. Government will receive no greater than Restricted Rights as defined in FAR 52.227-19(c)(1-2) (June 1987). U.S. Government users will receive no greater than Limited Rights as defined in FAR 52.227-14 (June 1987) or DFAR 252.227-7015 (b)(2) (November 1995), as applicable in any technical data.

Portions of this software are licensed by third parties including open source terms and conditions.

For detail information on third party licenses, see [Notice](#).

Contents

Absolutely! VEE 3.2 can freely mix VEE ID's and VXIplugandplay instrument drivers to communicate with different instruments. Users should not try to use both the VEE ID and the VXIplugandplay instrument driver to control the same instrument. Only one type of driver should be used to communicate with an instrument. Multiple types of drivers can be used in the same program as long as they are controlling different instruments.

If your instrument is not yet supported by VXIplugandplay, the VEE ID (if it is available) can be used to control the instrument. Wherever possible, MXD recommends the use of XIplugandplay instrument drivers to provide true open standards in instrument drivers.
