VEE Pro Revisions: All

In a word, *productivity*. VEE Pro will change the way you work, helping you accomplish every programming task -- from the most common to the most complex -- with speed, simplicity, and precision. Everything goes faster with VEE Pro , which is why it is the fastest growing visual programming language in the world today.

VEE Pro produces dramatic reductions in test development time by allowing you to connect functional icons, or objects. The resulting VEE Pro program, which resembles a block diagram, runs just like any program written in a textual language, such as C and HP BASIC. While the number of objects provided in VEE Pro is comprehensive, its real power lies in its unique balance of ease-of-use, functionality, and performance.

VEE Pro Facts

- Among current users, the #1 reason cited for using VEE Pro is to save test development time.
- 80% of VEE Pro users get on-the-job results in the first two weeks.
- Two-thirds of VEE Pro users incorporate non-Keysight instrumentation into their test systems.
- 93% of current users recommend VEE Pro to their colleagues.

Source: VEE Pro Customer Satisfaction Survey, 1997

"I use VEE Pro because it increases my productivity, and I can leverage the cost of existing equipment. I can do more with the equipment I already have. I use VEE Pro for everything under the sun." -- Karl Schmeer, Shire Industrial

"The primary benefit of VEE Pro has been the savings in time to market. We can now develop tests much quicker than before. Much of the code we develop is reusable. Programs are easier to understand and modify. Test development is something we enjoy doing rather than a tedious chore." -- Mike Hollis, Storage Technology Corporation.
