

Maximized View for .VXE Files

The following is a procedure for opening all .VXE files in maximized view mode on a computer with the Windows 2000 OS.

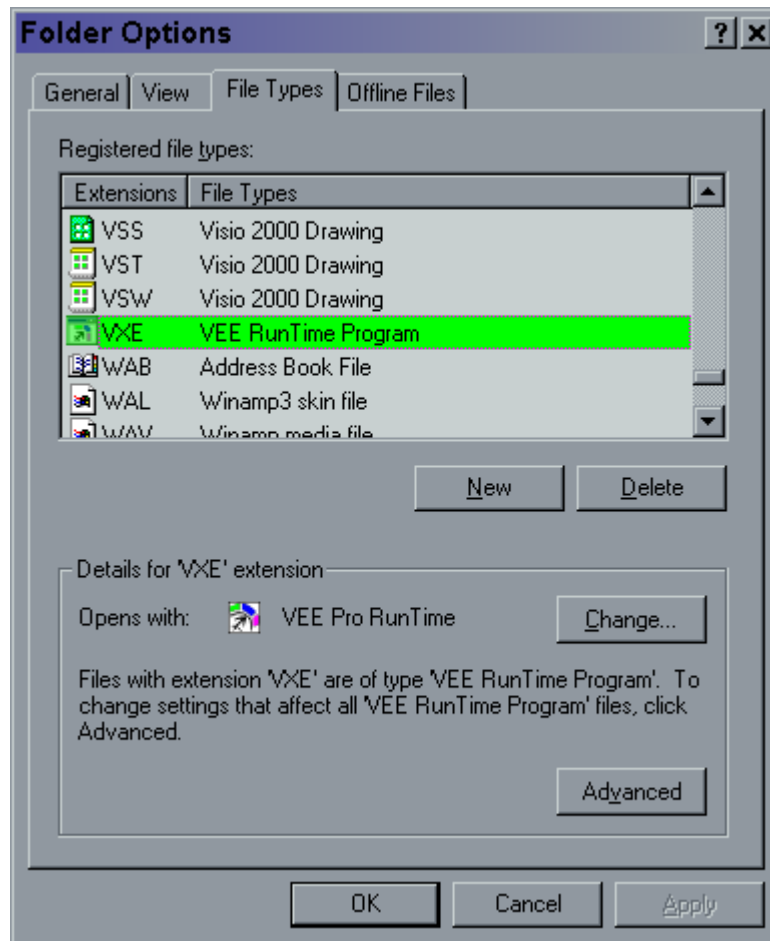

1. Right click on My Computer. Left click on Explore.

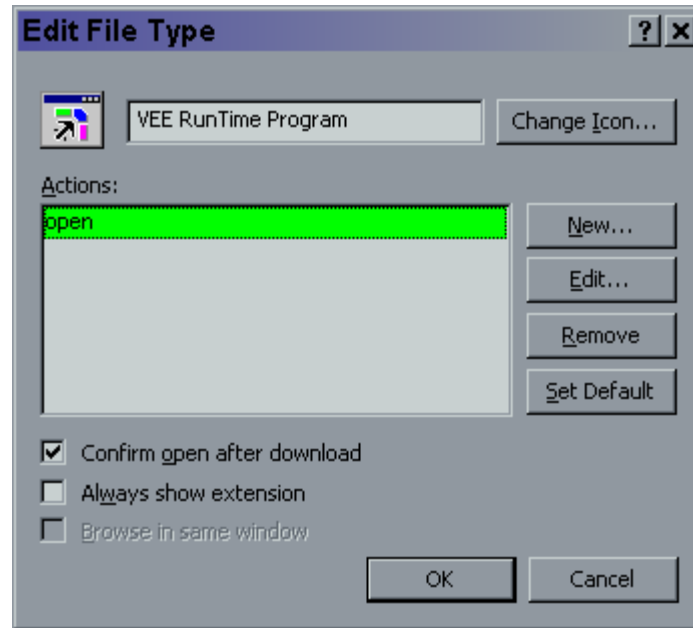

2. Left click on the Tools tab and select Folder Options.

3. Left click on the File Types tab and select VXE. Left click on the Advanced button near the bottom right corner.

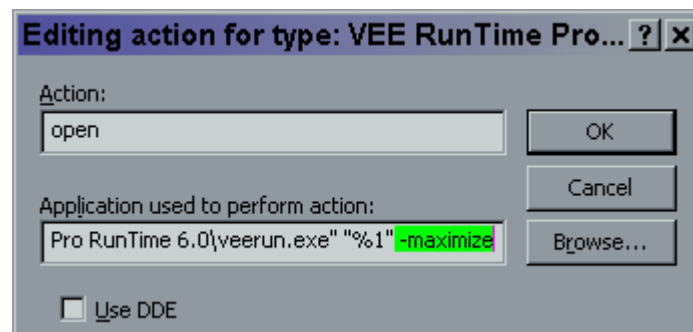

4. Under Actions left click on open, and then left click on the edit button.

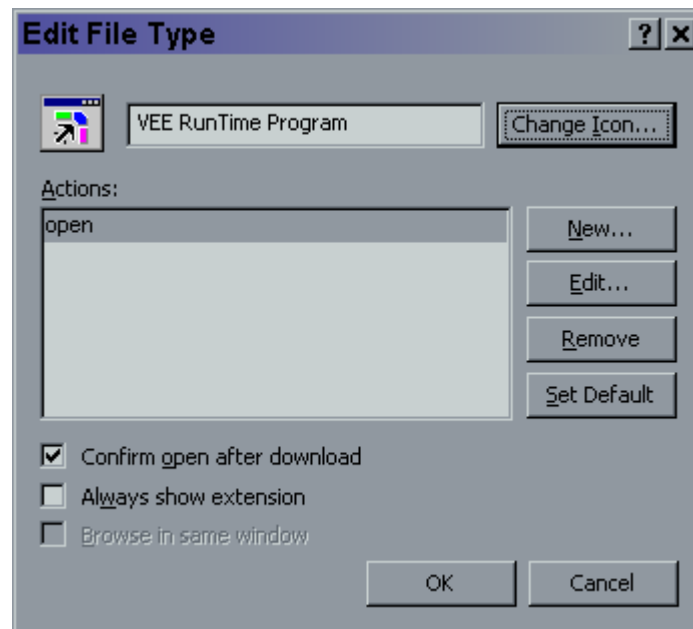

5. Left click on the field labeled Application used to perform action, and use your right arrow key to scroll all the way to the right of the text. Add the following text:

-maximize

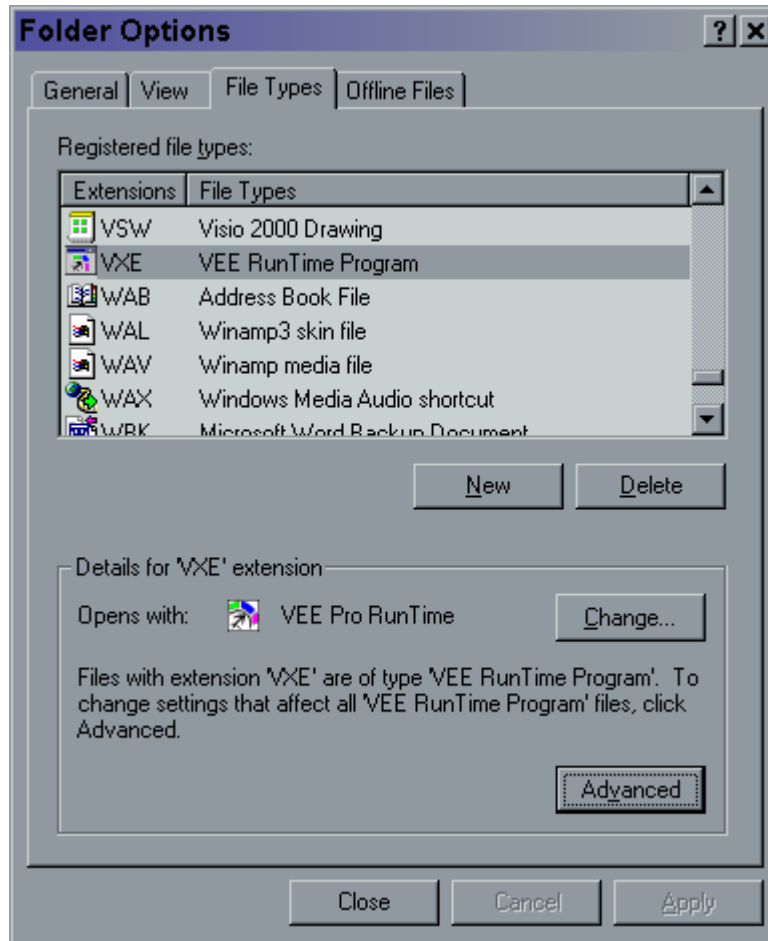

Then left click the OK button.

6. Left click the OK button.

7. Left click the Close button.

Now all the .VXE files will open in maximized view mode when you double click on the file itself or its shortcut.
