Hello everybody,

I'm trying to use a own ActiveX function in HPVEE. When I start the program normally I have a error "ActiveX object could not be created system error code: 0x80040154"(fig. 1).

When I start hpvee with Visual C++ 6.0 in the debug-mode the program runs very well(fig.2).

Does anyone have solution of this problem ?

Thanks

Claus
